

INTEGRATED APPROACH TO CLOUD TRANSFORMATION

Cloud applications and infrastructure has matured into a feature-rich and stable platform. Businesses are now taking the next step in their digital transformation. This step often involves adopting a cloud application or a shift from IT infrastructure to a cloud infrastructure platform such as OCI, AWS, or Azure. Our integrated team of on-prem and cloud solution architects can ensure your journey into the cloud delivers the speed your organization needs to stay competitive.

IMPROVED BUSINESS STRATEGY

At Adjacent Solutions, our cloud experts deliver a comprehensive and integrated approach to your unique cloud transformation. We help customers select the right cloud platform, align IT infrastructure to strategic goals, and deliver seamless integration of services and tools to meet business needs.

Utilizing the best industry practices, we can assist customers as they transition from on-premises solutions such as E-Business Suite or existing IT infrastructure into the cloud. Popular cloud applications include:

- Expensify
- NetSuite
- SplashBI
- Shopify
- Tableau
- And More

Our consultants tailor cloud migration planning to meet the specific needs of each organization, including training, contingency planning, and post-migration support.

ENTERPRISE CLOUD PLATFORM SUPPORT

In our commitment to helping organizations embrace digital change, our cloud migration specialists can assist customers with various cloud platform options.

Our industry knowledge and experience mean we can help businesses understand each cloud provider's capabilities, strengths, and limitations to mitigate risk. We can assist you with:
